

PEOPLES Fellowship

Fermilab is pleased to announce the creation of a new fellowship program in the name of our third director, John Peoples, Jr.

The fellowship is being created to facilitate the entry of scientists into the realm of accelerator science & technology at Fermilab.

OPPORTUNITY

Work on the highest energy particle accelerator in the world and help develop the forefront accelerator facilities of the future.

RESEARCH AREAS

Stochastic and electron cooling, muon storage rings, superconducting magnets, superconducting RF, linear colliders, large hadron colliders, accelerator controls and feedback, and computational physics and modeling.

TERM

Three years, extendible for an additional term if justified. Peoples Fellows will be classified as Associate Scientists.

ELIGIBILITY

Entry level accelerator physicists and accelerator related technology specialists, and post-docs in HEP or related fields.

APPLICATIONS

Candidates for Peoples Fellowships should apply online at <https://fermi.hodesiq.com/>

Applications should include a current curriculum vitae, four references, and an indication of a potential area of research interest.
